

Never Lost

Decyfer Down

Where could I go
To escape from you
Break from you
If I move beyond all eternity
You would be...

I fall every time into another place
Where I always find your single saving grace
Whether I have climbed or fell into the blue
I'm never lost from you
Never lost from you

I could ask the darkness
To envelope me
Cover me
But even the night is like the light to you
Shining through

I fall every time into another place
Where I always find your single saving grace
Whether I have climbed or fell into the blue
I'm never lost from you

I fall every time into another place
Where I always find your single saving grace
Whether I have climbed or fell into the blue
I'm never lost from you

Never Lost From You
