

## Helicopter

## Deerhunter

Take my hand and pray with me  
My final days in company  
The devil now has come for me  
And helicopters circling the scene

And I pray for rest  
Could you pray for us?  
We know he loves you the best  
We know he loves you the best

The light's inside my cave  
I'm tired of my cave

Oh, these drugs they play  
On me in these terrible ways  
They don't pay like they used to pay  
I used to make it day to day

No one cares for me  
I keep no company  
I have minimal needs  
And now they are through with me

Now they are through with me  
Now they are through with me  
Now they are through with me  
Now they are through with me

Now they are through with me  
Now they are through with me  
Now they are through with me  
Now they are through with me
