

# Goodbye

Default

All work and no play makes another dull day  
All work and no play makes another dull day

You're a car crash  
That's been going on for a year  
You're a hurricane that hits  
When the sky should be clear

i'm having doubt and I'm into the weeds  
You're everyone's fool and you're nobody's queen  
You're a royal flush with a suicide king  
You know we go together like cigarettes and gasoline

(chorus)

There's no reason to fight  
You know you may be right  
You know you may be right  
Tell yourself another good lie  
You keep saying you're strong  
You know you may be wrong  
You know you may be wrong  
There's a lot to be said for goodbye

Give me one good reason  
Why you think we're okay  
Give you ten thousand  
Why I'm walking away

I'm tired of fighting  
And sick of the pain  
Tired of the talking  
When you're acting insane  
Here we are at the end of the day  
We go together like kids and cocaine

There's no reason to fight  
You know you may be right  
You know you may be right  
Tell yourself another good lie  
You keep saying you're strong  
You know you may be wrong  
You know you may be wrong  
There's a lot to be said for goodbye

All work and no play makes another dull day  
All work and no play makes another dull day

All work and no play makes another dull day  
All work and no play makes another dull day

It's time to say goodbye

There's no reason to fight  
You know you may be right  
You know you may be right  
Tell yourself another good lie  
You keep saying you're strong

You know you may be wrong  
You know you may be wrong  
There's a lot to be said for goodbye

Said for goodbye  
There's a lot to be said for goodbye  
Said for goodbye
