

# Without You

Default

All these changes taking place  
It was time I didn't waste  
No regrets here to erase  
Throw them all away

Without you  
Would I feel  
Without you  
Would I find someone new  
Without you  
Now I see what I put you through

When most would fade away  
It's my thoughts of you that stayed  
There is no place to run to  
If I lost this view

Without you  
Would I feel  
Without you  
Would I find someone new  
Without you  
Now I see what I put you through

And now there's nothing left I can do
