

I don't miss you
I do not care where you are now
You're a ghost to me
Left with my taste in your mouth

Taken away somewhere new

I'm used to it
This body is here but I'm gone

When I re-awake, I'll re-awake in the waves
In a new realm
Catch this dream on film
You might just get used to it
And you'll smile, smile, and dive deep

I sail on these waves, Hey!
Slip into the calming waves, Hey!

You're an old hex
That just drained my will
So I put this gun to my head
And I smile, smile, and dive deep
I sail on these waves, Hey
Slip into the calming waves, Hey
Deep into the calming waves, Hey!

We have created
Now we're gone

And now a re-awakening
Another form of myself
I come right out of my skin

Slip into the calming waves
Deep into the calming waves
Slip into the calming waves
Deep into...

Right now
Bear witness
This rebirth
Right now...
