

Psychopathological Compulsion

Deivos

I beat her up unconscious and gagged her
another victim lured and abducted
methodically planned action flawlessly carried out
I have become a predator living for the hunt

fell the surge of endorphin rush
excitement of power and control
each human trophy I dominate
inspires me to kill once more

build up the rage reach for the blade
malicious intent in an outburst of hate

dwelling in an endless cycle, abduct - torture - dispose
high on instant gratification, mutilating the corpse
call me a monster hidden behind a mask of sanity
conscience, pity and remorse, they mean nothing

I took the butchers knife and stabbed her
another victim slain for pleasure
cut the body up into pieces, left'em on a riverbank
her coffin a blood - soaked suitcase, I sealed that fate

compulsive disregard for life leads my way
into the night hunt them down and kill again
