

Realm Of Desecration

Deivos

Nothing is deadlier than the seed of religion
The kingdom of heaven the birthplace of sickness

Cast out into the raging fires
the ones denied revenge plot with all their cunning
Conjure the rivers of blood of seraphs beheaded

And i take the hand of the devil
His hailstorm infesting and widening resplendent forever

Redeemed by sacrilege i've become more divine

Kill under the callous moon
Terorize ravage destroying the world
Break boundaries of their pain
Tormented lamenting in fire they weep

Rejoice in profanity the art of divination
I am the spirit the father the son
Entwined in desecration of their lies
voracious willpower destroying the trinity

Impious storm infernal scourge
Abort blessed cancerous growth
lament no more this is a war to reclaim this world

Cast out into our raging fires
The ones denied any mercy wail in pain
Bathing in the rivers of blood of dead seraphs

Ablaze the heavens avenge devour

Irreverence enthroned smothering godless tyranny
unvanquished curse flagellate all sanctity
Violate herd's beloved lord vitality multiplied a thousandfold
