

Tell Me About It

Delbert McClinton

They say that there's a hole in the atmosphere
The things you think will last just disappear
You were ready to say I do
Somebody lowered the boom on you
Now you need a sympathetic ear

So, baby,
Tell me about it
Tell me about teardrops in the dark
Tell me about it
Tell me all about your broken heart

You say you need someone to hold you tight
You can't stand another lonely night
Well, come closer and tell me about it

Love isn't always true, it hurts sometime
Your tears will tell on you, girl, I'm not blind
I know what you're goin' through
I graduated from that school, too
If you need a shoulder, cry on mine

Tell me about it
Tell me about teardrops in the dark
Tell me about it
Tell me all about your broken heart

You say you need someone to hold you tight
You can't stand another lonely night
Come closer and tell me about it

You took a lesson in playin' a fool
I graduated from that school, too
If you need a shoulder, cry on mine

Tell me about it
Tell me about teardrops in the dark
Tell me about it
Tell me all about your broken heart

You say you need someone to hold you tight
You can't stand another lonely night
Well, come closer and tell me about it

Tell me about it
Tell me about teardrops in the dark
Tell me about it
Tell me all about your broken heart

You say you need someone to hold you tight
You can't stand another lonely night
Well, come closer and tell me about it
