

Big Dipper

Delorean

Babe if you want to we could run away off into the sun
Babe if you want to we could run off

Babe if you want to we could run away off into the sun, into the sun

Babe if you want to we could run away off into the sun
But we would only turn from black to black into the dark

Round, round, around we go
Round, around we go
Round, around we go

We keep beginning again and again
Longing to belong to
Each new beginning

Babe if you want to we could run away off into the sun
Babe if you want to we could run off

Babe if you want to we could run away off into the sun, into the sun

Babe if you want to we could run away off into the sun
But we'd grow old and there'd be heat before we hit the first ray of light, first ray of light

Round, round, around we go
Round, around we go
Round, around we go

We keep beginning again and again
Longing to belong to
Each new beginning
