

# Lightweight

Demi Lovato

1. The slightest words you said  
Have all gone to my head  
I hear angels sing and your voice  
When you pull me close  
Feelings I've never known  
They mean everything  
And leave me no choice

R: Light on my heart, light on my feet  
Light in your eyes I can't even speak  
Do you even know how you make me weak

I'm a lightweight  
Better be careful what you say  
With every word I'm blown away  
You're in control of my heart  
I'm a lightweight  
Easy to fall, easy to break  
With every move my whole world shakes  
Keep me from falling apart

2. Make a promise, please  
You'll always be in reach  
Just in case I need  
You there when I call  
This is all so new  
Seems too good to be true  
Could this really be  
A safe place to fall

R: Light on my heart, light on my feet...  
I'm a lightweight...

3. Keep me from falling down  
Drowned in your love  
It's almost all too much  
Handle with care  
Say you'll be there

R: Oh, I'm a lightweight  
Better be careful what you say  
With every word I'm blown away  
You're in control of my heart  
I'm a lightweight  
Easy to fall, easy to break  
With every move my whole world shakes  
Keep me from falling apart  
Keep me from falling apart  
Keep me from falling apart, oh  
Falling apart
