## **The Promise**

## **Demis Roussos**

The promise that I never asked for Yet somehow I long for was my only possession A shelter and changing through fire and rain

A reason to go on and live for Never took the game for and afraid of the seasons

The lost dream that found me And I loved again An hour, do I go from here

I love you forever You meant it when you said it I love you, I still do What will I do without you?

It can't be, just simply can't be
You and I can't take it we've been of moments
Tomorrow will guide us
Tomorrow will show I love you forever
You meant it I know
An hour, do I go from here

I love you, I still do What will I do without you?

It can't be, just simply can't be
You and I can't take it we've been of moments
Tomorrow will guide us
Tomorrow will show
I love you forever
You meant it I know

The promise, the promise
