

If only they knew what we're doing  
Who knows, we might have a chance  
If only they'd hear what I'm saying  
God knows, we might have a chance  
To make a contribution  
A standing Institution  
I remember the dream  
Who can see where we're going?  
Maybe there's room for a change  
Time slips like sand through my fingers  
Sometime I feel so old  
Is it worth the mind games?  
Am I going insane?  
Oh, come in from the cold  
I wanna make it in my own time  
For absent friends and faces  
I wanna stay when the lights go up  
The show it wasn't wasted  
I wanna make it in my own time  
For absent friends and faces  
I wanna stay when the lights go up  
In a sea of faces  
Why am I always the loser?  
God knows I'm not like the rest  
You can survive on the surface  
I wish I could too  
Always walking the same road  
Always carrying the same load  
Come in from the cold  
I wanna make it in my own time  
For absent friends and faces  
I wanna stay when the lights go up  
The show it wasn't wasted  
I wanna make it in my own time  
For absent friends and faces  
I wanna stay when the lights go up  
In a sea of faces
