

Slip through the net  
You're on your own  
Crossing the water  
With all the blue lights on  
It's what you say  
And what you do  
Make for the change in the end  
Sensing the warm glow  
Got the picture now  
Watching a star go out in the black hole  
It's what you say  
And what you do  
Make for the change in the end  
Proxima Centauri  
Proxima Centauri  
Waiting for the answer too long  
Constant reminder too long  
It's what you say  
And what you do  
Make for the change in the end  
Approaching the centre  
Got to think again  
Scratching the surface  
No beginning to end  
It's what you say  
And what you do  
Make for the change in the end  
Proxima Centauri  
Proxima Centauri  
Proxima Centauri  
Proxima Centauri
