

# Standing On The Edge

Demon

Standing on the edge of the world  
Don't look back this is the ride of your life  
Standing on the edge of the world  
Engines on, it's your turn to fly

Bright lights all around you  
Waves of sound inside your head  
Black hole in the distance  
It's just a dream somebody said  
It's just a magic flight  
Is it day or night?  
We're on the edge of time now  
It's just a crazy scene  
A million laser beams  
Kaleidoscope it seems  
All round me now  
And all the stars are out  
In the sky tonight  
And all the stars are out  
In the heavens tonight

Standing on the edge of the world  
Don't look back this is the ride of your life  
Standing on the edge of the world  
Engines on, it's your turn to fly

Dark clouds sailing by me  
Red mist a raging sea  
Floating worlds passing by me  
Can't believe the things I can see  
It's just a magic flight, is it day or night?  
We're on the edge of time now  
It's just a crazy scene, a million laser beams  
Kaleidoscope it seems all round me now  
And all the stars are out in the sky tonight  
And all the stars are out in the heavens tonight

Standing on the edge of the world  
Don't look back this is the ride of your life  
Standing on the edge of the world  
Engines on, it's your turn to fly

And on another day, we'll find another way  
To go reaching for the stars  
There'll be another day to find another way  
We'll go reaching for the stars

Standing on the edge of the world  
Don't look back this is the ride of your life  
Standing on the edge of the world  
Engines on, it's your turn to fly

Standing on the edge of the world  
Don't look back this is the ride of your life  
Standing on the edge of the world  
Engines on, it's your turn to fly
