

# Time Has Come

Demon

Just a pair of dreamers  
You and me against the world  
Writing all those magic lines  
No one ever heard  
Riding all the storms together  
Reaching out to see  
Dreaming of a new tomorrow  
Didn't we

Two kids from the back street  
We were searching for the rainbow's end  
Riding on the wheels of fortune  
You and me my friend  
Taking all the highs and lows  
With a spirit that could tear down walls  
We learned to run  
To be free  
We gave it all

Oh, now the race is run  
Gotta to take it on for you  
See the journey through

Tonight, out there I hear the call  
I know that my time has come  
We sail against the odds  
And all the world will know  
Feel the warmth of the sun that shines in my face  
Take away the mask  
The time has come

Painting all life's pictures  
Well you know at least we tried  
And though the years have left their mark  
We're still the same inside  
Forever in those empty rooms  
Still the dream lives on  
And someone else will sing our song  
When we're gone

I guess we never sold out  
So we were never really in  
I wouldn't change the way it was  
Or the places I have been  
Just to have the chance to say  
All the things I never said before  
We learned to grow  
To be free  
We did it all

Oh, you took me by surprise  
Gotta take it on for you  
See the journey through

Tonight, out there I hear the call  
I know that my time has come  
We sail against the odds

And all the world will know  
Feel the warmth of the sun that shines in my face  
Take away the mask  
The time has come
