

Wings Of Steel

Demon

Where the river meets the sky I wanna in ships of gold
Where the night becomes the day
The sunrise takes your breath away
And all around the children sing
That the new born will be king forever

Chorus

Carry me on wings of steel
Let me dream then make it real
Take me to heaven one more time
Carry me on wings of steel
Let me dream then make it real
Take me to heaven one more time

Where innocence is real and all the things we love and feel
They will never be again
Won't you come away with me?
And let your feelings drift away
Now, forever and a day

Chorus

When we're standing in the dark
And the beating of our heart
Is the only sound we'll hear
When we fly above the cloud
With the angels singing loud
Celebrating peace on earth

And all around the children sing
That the new born will be king forever

Chorus
