

I've Got The Next Dance

Deniece Williams

I've got the next dance
I've got the next dance, with you
Oh I'll be waiting on you, all night
I've got the next dance
I've got the next dance, with you, with you

Sitting here, I've been drinkin' gins
Thought I'd have me some fun.
Feeling free, being me
While the night's still young.

Oh I've been watching you (watching you)
I'm waiting to (waiting to)
Well I've got this in hand.
There's a star (There's a star)
In your smile (In your smile)
You fit right into my plan.

I've got the next dance
I've got the next dance, with you
Oh I'll be waiting on you, all night
I've got the next dance
I've got the next dance, with you, with you.

You can sing the song,
Right there on the floor
Truth is I've been watching
Since you walked right in the door.
So let me make it clear
Long as I can?
Someone took my?
And there's nothing you can do.

I've got the next dance
I've got the next dance, with you
That's what I've been waiting for, yah yah
I've got the next dance
I've got the next dance, with you, with you.

You can sing the song,
Right there on the floor
Truth is I've been watching
Since you walked right in the door.
So let me make it clear
Long as I can?
Someone took my?
And there's nothing you can do.

I've got the next dance
I've got the next dance, with you
That's what I've been waiting for, yah yah
I've got the next dance
I've got the next dance, with you, with you.

I'm reaching out, I'm hoping that
You will take me by my hand.
You're so, right into my

Say you'll say you'll be my best man.

Ooh this girl, it's time to go.
Tell me you'll make so mine
See you, (You and me)
Where love is true (Love is true)
Let's try this one more time. (Let's spend the time)

Now that we've met,
We've really got to get
To know the way you feel
About the things I say.

So baby let me know
'Cause I don't want to go.
So give me all your?
And forever roll.?

I've got the next dance
I've got the next dance, with you
That's what I've been waiting for, yah yah
I've got the next dance
I've got the next dance, with you, with you.

Repeat chorus to fade
