

Around Everything

Denison Witmer

I need to take a look before you go away
Before I spend my time with what I need to say
You're so free around everyone but me

It's the city lights
And it's a New York sky
You don't want to hear
And I'm not ever right
You should be with
Anyone but me

We talk
Around everything

I need to hear a word
Before you go away
But you don't speak of my hurt
And that might never change
You could be with anyone but me

We talk
Around everything
