

10 Kinds Of Lonely

Depswa

I should've known that you would leave me
Lost, broken and lonely now
I must try to pick up the pieces of my heart
That you left for me

All in love we're all in love and the whole world smiles on you
and me
And all it takes is one heart-
break to find new meaning to misery
The signs, there where signs
But I couldn't read such a foreign language
Lies and there were lies
And they broke me down to eternal anguish in you

I should have know it from the beginning
That you'd take me for everything
Now as I sit here by myself
With ten kinds of lonely

Confusions locked in the mind like a cold wind on a summer's da
y
And unexpectedly
The chill crawls up through the spine freezing the heart till i
t cracks and falls
Into pieces
And only blind are left behind
Through the wreckage is found a clarity
And only then can I reach in and pull out the part of you
That's inside still killin' me

Yea., I wish I would've known Because there's no way to stop th
e pain of
10 kinds of lonely
Yea, I should've read the signs now I am just left behind
10 kinds of lonely
Yea, I wish I would've known because there's no way to stop the
pain of
10 kinds of lonely
