

# Heal My Soul

Derdian

Lost I was wandering through the shades of night  
Searching for answers that no man will find  
Then a revelation came and lit my mind  
A new way to live life came to light

Some strange new emotions are surrounding me  
New hopes and new aims are yet obscuring fears  
I stay here alone to face this world unreal  
"Hey Hey" screams of new forces in my heart  
Born from hate

Here we are  
To face the challenge of a painful hurt  
I've never thought that this would be so easy  
Drive my phantoms away  
Heal my soul  
Give me the strength to break all walls  
A brighter shining world you're going to create here  
Take my memories away!

An explosion I felt emptiness  
Digging a grave in my trembling certainties  
Lost in a dimension that I didn't know  
I had to find the courage, anything more

It seemed that my future would have only brought me shit  
I passed through my soul's storms and I chased my fear  
I stay here alone to face this world unreal

Screams of new forces in my heart  
Born from my hate

Here we are  
To face the challenge of a painful hurt  
I've never thought that this would be so easy  
Drive my phantoms away  
Heal my soul  
Give me the strength to break all walls  
A brighter shining world you're going to create here  
Take my memories away!

I have left my old way  
I turned the page to reach a better time  
As a breeze in this dawn  
I feel that something's moving all was still inside  
All is clear  
My past fears  
Depended on the apprehension to be inadequate!  
Face in the wind I'll fight  
The struggles of this quest that we call life!

Here we are  
To face the challenge of a painful hurt  
I've never thought that this would be so easy  
Drive my phantoms away  
Heal my soul  
Give me the strength to break all walls

A brighter shining world you're going to create here  
Take my memories away!
