

## Revelation Genocide

Desaster

The wait is over here the day, the last, the final  
dawn, fear this storm  
Apocalyptic reign of terror, the arrival of the soul  
devourer  
An end to face, an act of war the beginning of new  
times of wrath  
Engulf the abscess from inside! Revelation Genocide!

Please bleed to death  
Just heal our wounds  
Now end this nothing  
As wolf among sheep

A plague just call it epidemic  
Infected for your blessed sins  
Foulness covers wide this world  
Our kingdom our domain

Another plague the greed for war  
Attack, ravage, conquer all  
It's battle time, please open wide  
Pandora's box to end mankind

The plague that brings the final storms  
Testing what is fool or strong  
All waves of black through flesh of weak  
Annihilation of the human breed

A cosmic plague it sweeps  
Cleans the earth in conflagration  
Burned to death, rot in darkness  
Cosmic phenomenon, world wide funeral

Devastation of these times  
A new dawn will surely rise  
Conquering all foolish pride  
Revelation  
Genocide
