Victim Of My Force

The day is gone, I waited so long The moon is round, my slaughter is on Like a shadow in demonic light I'm haunting and prowling and stalking the night

Victim Of my force I'll show no remorse Victim of my force

Bleed and suffer Your screams come too late To face now my torment shall be your fate Must fulfill the dreams of the master I serve You're bidding and praying will never be heard

The urge so strong, no right or wrong Only my blade to seal your fate Seeking out victims to die by my hand I'm hunting and slashing and killing again

Victim Of my force I'll show no remorse Victim of my force

Bleed and suffer Your screams come too late To face now my torment shall be your fate Must fulfill the dreams of the master I serve You're bidding and praying will never be heard

You feel my force in agony Chained in horror you shall scream My frenzied laughter, your helpless cries I'm lord of sin, no one can defy Crawl on your knees, all hope is gone Soon you will be offered to the pentagram I'm king of terror, an insane beast You bloody victim for my feast

There's no escape, there's no return Out of the crypts in which you'll burn This horror is real and fantasy too I'm a priest of hell, make a slave on you

Victim Of my force I'll show no remorse Victim of my force

Bleed and suffer Your screams come too late To face now my torment shall be your fate Must fulfill the dreams of the master I serve You're bidding and praying will never be heard Tištěnoz www.txp.cz Sponzor: www.srovnavac.cz-šetříme na pojištění!
