

In Love This Way

Descendents

I'm lonely today, won't you come out to play
When I'm with you all the world goes away
Your smile and your eyes, they keep me alive
Your voice is a bell that massages my mind

And it make me wonder
And it makes me sad
And it makes me nervous
And it makes me mad

Because I think about you every night and day
And when I could have asked I let it slip away
I've got to get to know you, but I'm so afraid
Well it's so hard to be a friend and be in love this way

Oh talk to me please, you've brought me to my knees
Only your words melt my twenty year freeze
I've known you so long I've known all along
But suddenly my thoughts of you are so strong

Because I wonder if I'm more than just a friend
Did I really see a fire - or just inside my head
Sometimes I know you just want me to go away
Well it's so hard to be a friend and be in love this way

Karen may I see your blue eyes
Karen may I tell you tonight
That is makes me wonder
