

# Come A Little Closer

Desert Rose Band

Over the years I've tried to be a better man  
Over the tears that I've lied and I've cried  
Over the hill they say lies the better land and I know we can survive  
Come a little closer we can make it all work out tonight  
Come a little closer make me see it will be alright  
Come a little closer we can have it all tonight  
People drift apart when they're feeling lonely  
And lovers drift apart when they're running scared  
Strangers in the night beckon to you only whisper my name and I  
'll be there  
Oh won't you come a little closer...  
Come a little closer...

Oh when your touch is cold and time lies between us it hurts so  
bad just barely alive  
We cannot let our wonderings deceive us heaven knows we can survive  
Come a little closer...  
Oh won't you come a little closer oh yeah come a little closer  
Come a little closer come a little closer
