

Twilight Is Gone

Desert Rose Band

This has been
The longest night I've ever known
It's been so long
Since I've felt this alone
Sometimes I just can't see
The way things are supposed to be

Now that the twilight has gone
Now there is nothing left to say
There you go
You can have it your own way

Been in the dark so long
We couldn't see where it went wrong
Now that the twilight is gone

The first step is the hardest part
Where do we take it from here
Only after a hardened heart
Do tears finally disappear

And I'm on my own
Now that the twilight is gone

Lonely nights and crazy days
We sure let it slip away
Just tell me life goes on
Is there a new day with every dawn
Now that the twilight is gone

Now that the twilight is gone
Now that the twilight is gone
