

# I Would

Desmod

There's something about you  
That wakes me up every night  
A beautiful nightmare  
But I know this feels so right

There must be kind of magic  
In the way you look into my eyes  
I still remember  
The first time you got me hypnotized

I would change the storm into the Sun  
I would tell the Sun not to shine  
I would make the stars explode tonight  
Just let me be your thunder

I would change the rain into the storm  
I would tell the rain not to fall  
I would make the stardust snow  
Just let me be your thunder

There's something about you  
That makes me walk thousand miles  
It's an addiction  
But I know this feels so right

There must be kind of magic  
Seems like I've got into your trap  
I'm not afraid at all  
I know there is no turning back

I would change the storm into the Sun  
I would tell the Sun not to shine  
I would make the stars explode tonight  
Just let me be your thunder

I would change the rain into the storm  
I would tell the rain not to fall  
I would make the stardust snow  
Just let me be your thunder
