

# Lightspeed

Dev

They say I gotta have a plan  
I say if you don't burn you won't tan  
They say I gotta watch myself  
I had my cake and watch it melt  
Uh, I'm gonna pack it with a rocket, I'ma cock it  
And blow the roof off this boogie club  
Fuck the haters, gimme some love  
Don't be so pretentious  
I fake gold like a dentist  
And if I said it, then I meant it  
He a soccer player, he headed  
I'm going lightspeed  
Drinking rice drink, dripping Visine  
Bitch, cover your eyes  
You won't find me  
Even beside me you're behind me

By the time you on it I'll be off it  
By the time you get it I'll be done wit' it  
You know that we be going lightspeed ahead  
Everybody told me I should slow down  
But instead all I could do was take it  
Lightspeed out of space and there is no calculation  
Tell me, am I out of my head?  
Or are we really going lightspeed?

We are experiencing some turbulence  
It's the Cataracs

If you ain't on my flight you gettin' flown over  
Under a palm tree, that's where I'm lying  
Like when I tell people I'm sober  
Got a devil on one shoulder and an angel on the other one  
But I ain't never listened to none of 'em  
It's been a crazy road running  
And no, I ain't never stopped running  
People talking about something  
But I, I ain't never heard nothing  
The sun is set and the clouds are moving  
The sky is black and I'm used to it  
We awake all night, who knew it?  
I got a dark soul, you could never see through it

By the time you on it I'll be off it  
By the time you get it I'll be done wit' it  
You know that we be going lightspeed ahead  
Everybody told me I should slow down  
But instead all I could do was take it  
Lightspeed out of space and there is no calculation  
Tell me, am I out of my head?  
Or are we really going lightspeed?

We are experiencing some turbulence  
It's the Cataracs

Are we really going lightspeed?  
Are we really going lightspeed?

Are we really going lightspeed?
