

Long Song

Devendra Banhart

Long song with words of all kinds
Song sung it sparkles and shines
You paint the pools that lie on their backs
Skip a stone and spit past the cracks

Blue song sung loose at my knees
The wind sing for horseflies and bees
Well who knows, explain
Who knows, explain

Who knows, explain
Who knows, explain
The sea song for sights your eyes find
Your eyes note of colors and lines

The sad song as the weather hold hands
The love song stood loose but it stands
The movers moved away
The song sung let it stay

The movers moved away
The song sung let it stay
The sea song for sights your eyes find
Your eyes note of colors and lines

The sad song as the weather held hands
The love song stood loose but it stands
The movers moved away
The song sung let it stay

Well who knows, explain
Who knows, explain
