

## Inner Force

## Diabolus In Musica

Search your inner strength, find the self within  
Explore your consciousness, set out on your quest

Here I come through space and time  
Born from your nightmares  
But modeled by the energy of life

You can decipher  
From night I rise  
An improved version  
Of everything you didn't dare to start

Don't you recognize your eyes in mine?  
If you only looked up in the sky  
You would be able to see  
The sun rises always near  
Every morning shines and waits for you to live

Search your inner strength, find the self within  
Explore your consciousness, set out on your quest

I'm an illusion  
Maybe not real  
Just a reflection  
Of inner fears that drowned your beliefs

Don't you recognize your eyes in mine?  
If you only looked up in the sky  
You would be able to see  
The sun rises always near  
Every morning shines and waits for you to live

You had fed your perfect hell, have built your fears,  
have set your downfall

Don't you recognize...

You have fed your perfect hell, have built your fears; have set  
your downfall  
Seek deep in your soul and you will find the true self that lie  
s within you. Deep down inside.
