

New Era

Diabolus In Musica

New era is here waiting for me
A new reality will appear, are you ready for a
New life?
Our revolution's going to start
Come with us prepare the future, are you ready
For the new life?

A new life has just began
I vae learnt to live
And I just want to keep this feeling
If I could stop time
And catch it with my fingers
I would fly...

And I could start my revolution
My heart against the world
I am going to find my own solution
My own war

Don't you think that it's enough?
Don't you see the tears of the earth?
Our mother's crying
We all are accomplices of disaster
And of hate

You cannot stop my revolution
My heart against the world
I am just finding my own solution
It's my war

New era is here waiting for me
A new reality will appear, are you ready for a
New life?
Our revolution's going to start
Come with us prepare the future, are you ready
For the new life?

A new life has just began
It's my turn, it's time for changes
The present will become the past
New era is here
To take us on a long trip
To my dreams

At kast I've started my revolution
My heart against the world
Here you are this is my own solution
My new war
