

# God Is There

Diamond Rio

Surrounded by the darkness  
It all came down too soon  
Longing for redemption  
In this cold hospital room,  
God is There.

What will she tell her family  
Still her daddy's little girl  
She can't believe she's showing  
Carrying the weight of the world  
God is there

Where you think he won't come to  
That's where he'll be  
Waiting for you

God is there  
In the middle of your night  
In every single moment  
Of every single life  
He's reaching for you  
Right where you are  
The God of the impossible is never very far  
Oh, imagine a place He would never be  
God is there

From the miracle of new life  
A journey just begun  
To the anguish of a father  
For his prodigal son  
God is there

We offered up our story  
He's with us till it's done  
I'm safe in this truth

God is there  
In the middle of your night  
In every single moment  
Of every single life  
He's reaching for you  
Right where you are  
The God of the impossible is never very far  
Oh, imagine a place He would never be

No height no depth  
Not life nor death separated you, ever separated you

No height no depth  
Not life nor death separated you, ever separated you

No height no depth  
Not life nor death separated you, ever separated you,  
ever separated you.

Ohhh

God is there  
In the middle of your night  
In every single moment  
Of every single life  
He's reaching for you right where you are  
The God of the impossible is never very far  
Oh, imagine a place He would never be,  
God is there.  
hmmmm, God is there.
