

# I Could Do It With My Eyes Closed

Diamond Rio

Moonlight in a dew drop  
Two miles to the ridge top  
One hand on the wheel is probably  
One more than I need  
Bald tires in a dirt rut  
Chauffeur us all the way up  
We've been there enough  
All we gotta do is turn the key

Just like the back of your hand  
I know my way around this land  
Around every curve and bend  
From your heart down to your soul  
There ain't nothin' I can't do  
When it comes to lovin' you  
It's like flying down these old back roads  
I could do it with my eyes closed

We'll kill the motor when we get there  
I'll pull the ribbon from your hair  
We'll lay up on the hood and I can stare at you all night  
And you'll say when we're over that hill  
Are you gonna love me still  
Well baby you know I will  
It's just like ridin' a bike

Just like the back of your hand  
I know my way around this land  
Around every curve and bend  
From your heart down to your soul  
There ain't nothin' I can't do  
When it comes to lovin' you  
It's like flying down these old back roads  
I could do it with my eyes closed

They can't tell us love is blind  
Cause it brought us right where we are tonight

There ain't nothin' I can't do  
When it comes to lovin' you  
It's like flying down these old back road  
I could do it with my eyes closed  
I could love you with my eyes closed  
I could do it with my eyes closed
