

Kiss Me

DeGarmo, Diana

An old coke bottle on the hardwood floor
Where it stops nobody knows
I was just hoping that it would land on you
Oh man you shoulda seen your face
The fear in your eyes when it spun your way
I grabbed your hand like I knew what to do
I was sure, you were shy
I said, "don't be scared it's alright"

Just close your eyes and kiss me
I wanna have that feeling just one time
For a change let's throw our fears away tonight
Just close your eyes and kiss me
I wanna let my heart see what it's like
I've got butterflies and chills up my spine
But the moment's right
So close your eyes and kiss me

One spring night at the senior prom
You took a chance on the last slow song
My heart skipped a beat when you asked me to dance
I didn't know what to say
But you said "too many words get in the way"

Just close your eyes and kiss me
I wanna have that feeling one more time
For a change let's throw our fears away tonight
Just close your eyes and kiss me
I wanna let my heart see what it's like
I've got butterflies and chills up my spine
But the moment's right
So close your eyes and kiss me

Some old tin cans tied to your truck
By your best man, we were so in love
We said our vows and I started to cry
You took my hand and said it's alright

Just close your eyes and kiss me
I wanna have this feeling for the rest of my life
That game, that dance, that love
Brought us here tonight
Just close your eyes and kiss me
Finally my heart see's what it's like
I've got butterflies and chills up my spine
But the moment's right
So close your eyes and kiss me
Yeah
