

# I Never Loved a Man Before

Diana Ross

Deep in the night when you think the world is fast asleep  
You come to me, take me where I wanna go  
Making promises I know you'll keep  
You're the first love in my life  
And the moment we touch I can tell you how weak I've grown

You make me feel like I never loved a man before  
Never held him in my arms, never told him I loved him  
I remember all the lovers coming through my door  
But you make me feel like I never loved a man before

It's hard to say it, words don't come so easily to me  
But it's here in my heart and it's making me lose control  
What else can I tell you, who'd refuse a night  
That takes you away and touches your very soul

You make me feel like I never loved a man before  
Never held him in my arms, never told him I loved him  
I remember all the lovers coming through my door  
But you make me feel like I never loved a man before

I went along looking at love differently  
Oh, but now it's so strong  
Look what you've done to me

You make me feel like I never loved a man before  
Never held him in my arms, never told him I loved him  
I remember all the lovers coming through my door  
You make me feel like I never loved a man before
