## When Will I Come Home to You

**Diana Ross** 

Remember me A face you used to see Not the same song that I used to be I had their words passing through me But I just can't find the rhymes I've been every place but right so many times

When will I come home to you Whenever you want me to It's a cold and lonely world When you're not loving me

Your world is my only one I'm back where I started from There's no place that I would rather be

## Remember me

The girl who thought that she Could get lost in unreality I've been around up and down I've never missed a single rhyme I've been everything there is but satisfied

When will I come home to you Whenever you want me to It's a cold and lonely world When you're not loving me

Your world is my only one I'm back where I started from There's no place that I would rather be

When will I come home to you Whenever you want me to It's a cold and lonely world When you're not loving me

Your world is my only one I'm back where I started from There's no place that I would rather be

When will I come home to you Whenever you want me to It's a cold and lonely world When you're not loving me

Your world is my only one I'm back where I started from
