

Closer

Dido

So leave your taxi waiting
And turn and close my door
And sit back down where you were sitting
A little closer then before

When you look that serious
It just makes me want you more
And I've been meaning to tell you

R: The closer you get, the better I feel
The closer you are, the more I see
Why everyone says I look happier
When you're around

The closer you get, the better I feel

And yes I know you're nervous
Never seen you so unsure
You haven't touched your food tonight
And you're drinking more and more

And there's no need to hurry
Take you're time I'll still be here
And I've been meaning to tell you

R: The closer you get, the better I feel...

We've been circling for time baby
We're coming down to land tonight
The wait is over and now it's easy
Everything is fine

R: The closer you get, the better I feel...

The better I feel, the closer you get
The better you see, the closer you are
The better I see, why everyone says
