

(A New) Society Treaty

Die Krupps

Each of you must distinguish for himself
Between the scenes of cold reality and those of pure illusion
The conscious thought the subconscious mind
Finds society over the line tongues are silent when there is danger
Eyes are blind when there's abuse ears are deaf
When someone pulls the trigger nowhere do I see humanity
Don't have to be god to realize no one here gets out alive
But you have your chance - I got mine let's make it better one more time
Peace the world back together again make it all worth existing again
Peace society together again make it all worth existing again
A new society treaty - a bond between man
A new society treaty - it's the law of the land
Constitutions steeped in gold, blood and pride
Living by this caused the great device
Order without authority should be the foundation of a new society treaty
We have seen illusion and reality begin to overlap and fuse
The line between them begins to disappear
Don't have to be god to realize no one here gets out alive
But you have your chance - I got mine let's make it better one more time
Peace the world back together again make it all worth existing again
Peace society together again make it all worth existing again
A new society treaty - a bond between man
A new society treaty - it's the law of the land
A new society treaty - for the preservation of man
A new society treaty - take this extended hand
Take my hand
