

Suffer

Die Mannequin

You're not my regular nurse
I guess I gotta get hurt
I know for better or worse
(Can't take another day)

Revenge of the... ladies
And while we realize our fate
We make a hospital break
(And make our get-a-way)

Neurotic, and you bought it
By product of a psychotic
And tonight we're renegades

Get a way, and away
Get away before we really suffer
It's not okay, it's not okay
Until the take me away

As torture turns I create
A martyr saving the day
I fell on all your mistakes
(And give them all away)

Wait, you can't just leave him alone
Until he bitches and moans
And you're accosted at home
(Payback is quick that way)

Affected, rejected
By product of the corrected
An eye for an eye today

Get a way, and away
Get away before we really suffer
There's no way, there's no way
Until the lock me away

Fixated, sedated
No electric shock could erase it
And they die another day

Get a way, and away
Get away before we really suffer
It's not okay, it's not okay
Until the put me away
Get a way, get away
Get away before we really suffer
