

Fear The Fever

Digital Daggers

I fear the fever
Deep in my bones
It runs electric
It draws me home
It knows the weakness
Deep in my soul
It keeps me hostage
I'm never alone

Maybe you should go?
Baby can't control
Maybe you should go?
Baby can't control

It wants to kill you
It wants to tear you apart
It wants to thrill you
This vengeful love that I've got
Wants to consume you
Then spit you out
I fear the fever, fear the fever
Can you feel it now?

I fear the fire
Burning below
Its gonna to trick you
Swallow you whole

Maybe you should go?
Baby can't control

It wants to kill you
It wants to tear you apart
It wants to thrill you
This vengeful love that I've got
Wants to consume you
Then spit you out
I fear the fever, fear the fever
Can you feel it now?

You know you're not safe here
I'll only bring you down
Can't help you disappear
My love, it's too late now
You know you're not safe here
I'll only bring you down
The end is almost near
My love, it's too late now

It wants to kill you
It wants to tear you apart
It wants to thrill you
This vengeful love that I've got
Wants to consume you
Then spit you out
I fear the fever, fear the fever
Can you feel it now?

It wants to kill you
It wants to tear you apart
It wants to thrill you
This vengeful love that I've got
Wants to consume you
Then spit you out

I fear the fever, fear the fever
Can you feel it now?

(You know you're not safe here)
(I'll only bring you down)
