

# Out Of My Head

Digital Daggers

In the porcelain, there's a crack  
I've seen your dark side  
Now there's no turning back  
Tasted the poison on your tongue  
It almost killed me

I know what's underneath the mask  
What seemed so good at first is under attack  
I'm in the wreckage, damage done  
It almost killed me

I loved you like a burning effigy  
Now all that's left is cinders  
(Now all that's left is cinders)  
In the darker days of you and me  
When every little bit of it hurts

I gotta get right, get right, get right  
Out of my head  
Woah, oh, woah  
Oh, oh, it's gonna blow  
Get right, get right, get right  
Out of my head  
Woah, oh, woah  
I gotta let it go

Disappointed disengage  
You wrapped your limbs around me  
Hard to escape  
I'm catatonic, cannot run  
It almost killed me

I got too caught up so I loved you like a burning effigy  
Now all that's left is cinders  
(Now all that's left is cinders)  
In the darker days of you and me  
When every little bit of it hurts, hurts, hurts, hurts!

I gotta get right, get right, get right  
Out of my head  
Woah, oh, woah  
Oh, oh, it's gonna blow  
Get right, get right, get right  
Out of my head  
Woah, oh, woah  
I gotta let it go

Your heart was a curious obsession  
I can't feel it, I can't feel it  
Your heart, it was never my possession  
I can't steal it, I can't steal it  
Walk away, walk away, gonna be okay  
Walk away, walk way, god, I wanna stay

I gotta get right, get right, get right  
Out of my head  
Woah, oh, woah

Oh, oh, it's gonna blow  
Get right, get right, get right  
Out of my head  
Woah, oh, woah  
I gotta let it go

I can't feel it  
Oh, oh, it's gonna blow  
Get right, get right, get right  
Out of my head  
I can't steal it  
I gotta let it go
