

## Still Here

Digital Daggers

Musing through memories  
Losing my grip in the grey  
Numbing the senses  
I feel you slipping away  
Fighting to hold on  
Clinging to just one more day  
Love turns to ashes  
With all that I wish could say  
I'd die to be where you are  
I tried to be where you are  
Chorus:  
Every night I dream you're still here  
The ghost by my side, so perfect, so clear  
When I awake, you disappear  
Back to the shadows  
With all I hold dear  
With all I hold dear  
I dream you're still here  
I dream you're still here  
Hidden companion  
Phantom be still in my heart  
Make me a promise that  
Time won't erase us  
That we were not lost from the start  
Oh, I'd die to be where you are  
I tried to be where you are  
Chorus:  
Every night I dream you're still here  
The ghost by my side, so perfect, so clear  
When I awake, you disappear  
Back to the shadows  
With all I hold dear  
With all I hold dear  
I dream you're still here  
I dream you're still here  
Ever slightly out of reach  
I dream you're still here  
But it breaks so easily  
I try to protect you  
I can't let you fade  
I feel you slipping  
I feel you slipping away  
Chorus:  
Every night I dream you're still here  
The ghost by my side, so perfect, so clear  
When I awake, you disappear  
Back to the shadows  
With all I hold dear  
With all I hold dear  
I dream you're still here  
I dream you're still here  
(Every night I dream you're still here)  
Every night I dream you're still here  
(I dream you're still here)  
Every night I dream you're still here  
Every night I dream you're still here  
(I dream you're still here)

Every night I dream you're still here  
Every night I dream you're still here
