

Crash

Digital Summer

Something in the way
That you manipulate
Everyone that's ever loved you

Take for granted everything is true
Now your lies are catching up with you
Just take what you have earned
Soon you'll get what you deserve

Life crashes down around you
Will you be there to take the fall?
When your world falls to pieces
Are you willing to lose it all?

You don't appreciate
You only desecrate
Everything that surrounds you

Never know when you've had enough
Never there for the ones you love
One day you might just learn
You have no bridges left to burn

Life crashes down around you
Will you be there to take the fall?
When your world falls to pieces
Are you willing to lose it all?

All around
All around
Life crashes down
All around
All around

Life crashes down around you
Will you be there to take the fall?
When your world falls to pieces
Are you willing to lose it all?

Crashes down
(Crashes down)
Will you be there to take the fall?
When your world falls to pieces
Are you willing to lose it all?
