

Cut Me Open

Digital Summer

Set the best of me on fire
Leave the rest of me to die
Cover up these empty scars with all your promises and lies
And I know better and so should you
Beaten down, never been so low
You get off being in control
But this time I realize from the bottom there's no place left to go

My body is numb, the damage is done
You can cut me open you can bleed me dry
I suggest you kill me cause you're never taking me alive
You can tear my heart out strip away my pride
Do your best to break me but I promise you I will survive

Torn apart by a heart so cold
Made me question everything I know
But this time, I realize from the bottom there's no place left to go

I'll even be the one to give you the knife
You wanna hurt me, so go ahead and try
You better face me, when you twist the knife
And I expect you to look me in the eye
Just turn and face me
