

Just another touch of your skin makes everything okay
Just a simple taste of your lips can steal my pain away
Every time that I look in your eyes I can see something's killing you
So don't fight what you're feeling inside cuz I know you need this too
Let me be the one you use...

I'll be your antidote, you be my cure for this cold and lonely night
Put our problems behind us and just for this moment pretend everything is alright
Let me use you... And I'll let you use me
Let me use you... To forget these memories

I don't even mind that we hide some things that are better left unspoken
Can't we just be selfish for one more night cuz some rules were meant to be broken
And I don't know how we got here, but I know that I shouldn't care
And despite what we think is wrong or right, We both know that I shouldn't be here tonight...
But it's worth a try

[Chorus]
...You're like a drug and I am so addicted to you
But I can't let go even though I know I should, it's true

[Chorus]
Let me use you...
Like you want me to
Let me use you
You can use me...
To forget these memories
