Coming Over

Dillon Francis

Is it alright if I come round Is it too late if I come now Would you stay up to figure this out Some way If I stay here would you come back If I stay cool would you be mad Would you want me if I want you That way

Cause all I can think about is coming over, coming over All I can think about is coming over, coming over All I can think about is coming over, coming over

Isn't it strange that every time I look at your name I'm suddenly high For you to feel the same I would do almost anything I'd give away this, give away that All of my shoes and all of my hats All I need's you and a bit of music

Cause all I can think about is coming over, coming over All I can think about is coming over, coming over All I can think about is coming over, coming over
