

# Green Mind

Dinosaur Jr.

How ya' doin'?

I picture things a certain way  
Then go back to it another day  
The green mind said it's okay

Cause you know where they're gonna be  
All's you have to do is come with me  
It's cool, they're probably asleep

On the outside  
That's where they always hide  
Come to my side

And I'll introduce you to  
Some of their kind  
I know you've always tried

And now it's your time to take  
In their point of view  
Oh, it's nothing new

I been bouncing off the wall  
I can't handle them for long  
They're cool, but I need you  
On a certain level I think they're great  
But on another I can't relate  
To anything they do

On the outside  
Might be with them tonight  
Unless you decide to come in I'll check out you

Hangin' heavy, such a routine  
I've just begun to forget why  
I seldom try to break out of their scene

And now I gotta work on you  
So the frogs'll hang  
They'll always be hangin'  
Now we're here, what do we do

I've been sortin' through the pros  
And cons of your eyes farewell, toes  
Can't you help move it along  
I been pickin' through my thoughts  
It's a shame my judgment rots  
And I sure feel rotten long

On the outside  
Well, it'll be a while  
I gotta unfry  
'Fore I pick it up with you  
Help me

Do I need that stable care  
Don't I know that they'll be there

Does that count now you've appeared

Do I need that stable core  
Or do I jump for something more  
Are you all that I fear?

I been pickin' through my thoughts  
It's a shame my judgment rots  
And I sure feel rotten long

It's a call that's tough to make  
It could be a big mistake  
Can't you help move it along

If I keep stewin' 'bout how I feel  
That's real, I'll split, Then I won't have to deal  
Sounds like a plan

But it's kind of lame to let it slide  
Knowin' either way I haven't tried  
Can't figure out where it all stands

In a green mind
