Faces in the Window

Give me - shelter - shelter I can face the day Then I'll just fade away Give me shelter Give me shelter Sleep comes - slowly The fire starts to die You open up your eyes Faces in the window Noises in the night Faces in the window Hiding from the light Faces in the window We are - evil And we are all divine Creations of the mind We are pleasure I see - clearly Who's behind the wall Yes, I can see us all We're faces in the window Noises in the night Faces in the window Hiding from the light Faces in the window Give me shelter - shelter - shelter Give me shelter - shelter - shelter Faces in the window Noices in the night Faces in the window Hiding from the light Faces in the window Faces in the window Faces in the window Faces in the window When the fire starts to die And you open up your eyes There they are in the window Faces in the window We are evil and divine Just creations of the mind And faces in the window Faces in the window Faces in the window Faces in the window
