

This Is Love

Dionne Warwick

Tell me why must we hide
From the world what we feel inside
Oh why, love's alive in my eyes
Begging you, still you're much too shy
To try

There's really nothing to it
It happens every day
Boy meets girl and love is on the way
Birds and bees, they do it
They believe in love
So if you feel it, too
We don't have to hide

Don't you worry about it, baby
This is love and it's all right

Don't you worry about it, baby
This is love and it's all right

Seeing you, wanting you
Wishing I could be close to you tonight
I can do things for you
If you just change your point of view
It's true

There's really nothing to it
It happens every day
Boy meets girl and love is on the way
Birds and bees, they do it
They believe in love
So if you feel it, too
We don't have to hide

Don't you worry about it, baby
This is love and it's all right
