

## Prozac Junkies

Diorama

different light different meaning  
not imagined not unreal  
don't quit the friendship I'll agree  
prozac junkies like you  
prozac junkies like me

no control no reservation  
auto pilots by themselves  
the invisible enemy  
prozac junkies like you  
prozac junkies like me

give us the needle  
take control  
give us the needle  
lead us to believe we're loved  
prozac junkies always find a way  
prozac junkies always find a way

I'm the origin drawing lines  
from the mirror to the stars  
vectors through infinity  
and we'll be living on love

give us the needle  
take control  
give us the needle  
lead us to believe we're loved  
prozac junkies always find a way  
prozac junkies always find it's better like this  
better like this better like this better this  
better like this better like this better this

it's better like this

give us the needle  
take control

if only I could calm the dogs between my temples

and there is nothing you can change  
there is nothing you can do  
just wait until it's over  
wait until it's over
