

# Synthesize Me

Diorama

Synthesize me  
Make me your  
Love and hate machine  
And I can serve you better

Start the true  
Emotion scheme  
Till I'm no longer forced  
To keep my vital functions

Synthesize me  
And reboot  
I need to start again  
I need to make it different

All unguarded  
All without  
The will to play along  
Benumb its futile feelers

I'm half  
Alive  
My skin's  
Intact  
I'm only staring at... the blade

Synthesize me  
Wash away  
The trash I'm piling on  
To mesmerize the moment

I'll drop the needle  
My settings work  
No stunted interactions  
No doubts, no paranoia
